PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/532,654	Applicant(s) SHORT, BRUCE ARCHIBALD	
	Examiner Thomas A. Beach	Art Unit 3671	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 5, 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Melander 6,431,785. Melander shows apparatus for connecting an implement to a prime mover, the apparatus including a connector that is mountable on the prime mover

(fig 1) and has at least one recess 26 for receiving a connecting pin 50 mounted on the implement to enable the connector to engage the implement, having means is provided for mounting on the connector a retaining element 42 positioned so that a head 40 of the retaining element serves to retain the connecting pin in the recess.

As concerns claim 2, Melander shows the retaining element has a tail portion 43 connected to the head 40 and the connector has a formation in which the tail portion can be inserted 46 and which serves to secure the retaining element on the connector with the head of the retaining element projecting into the recess adjacent the connecting pin.

As concerns claim 5, Melander shows at least a portion of the head is larger than the formation so that the head is unable to enter the formation (fig 3).

As concerns claim 6, Melander shows the head has a face that bears on a face of the connector after the tail portion has been inserted in the formation (fig 3).

As concerns claim 7, Melander shows the face of the connector is at least partly located in the recess (figs 3 & 5).

As concerns claim 8, Melander shows the connector comprises spaced apart side walls joined together by a cross member that is prefabricated and in which the recess is formed before the cross member is joined to the side walls (fig 5).

As concerns claim 9, Melander shows the connector comprises spaced apart side walls joined together by a cross member in the form of a plate that is bent to form the before the cross member is joined to the side walls (fig 5).

As concerns claim 10, Melander shows the formation is formed in the cross member before the cross member is joined to the side walls (fig 5).

Allowable Subject Matter

5. Claims 3-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
